

Kelsey Suyehira
Checkpoint 1
CS 597 - Enterprise Web Development
BSU Fall 2015

Oct 08, what new functionality or technical hurdle will you have complete?

- Setup framework/main pages
- Design and setup database
- Purchase domain name

Unfortunately, I was not able to complete my goals for this checkpoint. I do not have a good reason except that grad school is hard and I am still working on mastering my time management skills.

I'm hopeful that this will not put me behind for the rest of the semester and that I will be able to catch up by the next checkpoint.
